

# Screw Compressors 55 - 90 kW

KSA / KSV 55 - 90 Series

Smart and affordable

# The New Generation

Industries across the globe rely on Champion rotary screw compressors for the supply of high quality compressed air. The KSA/KSV55-90 Series air compressor range incorporates the best of Champion technology, design and quality, to deliver reliable, economical and efficient performance in a completely new package.

The KSA/KSV Series delivers high quality air at volumes of 9.5 to 15.3 m<sup>3</sup>/min at a pressure range between 7 and 10 bar and is available in either air or water cooled versions.

#### High Efficiency Air End

KSA/KSV Series screw compression elements are manufactured in-house using the latest CNC rotor grinding machinery, coupled with on-line laser technology, in order to maintain precise manufacturing tolerances.

Champion's commitment to quality ensures KSA/KSV Series compressors offer the highest levels of reliability and performance with low operating costs throughout the compressor's life.

### Maximum Durability

We maximise service life and durability by eliminating elastomer and thermoplastic pipe and tube in system pressure lines, replacing them with corrosion resistant stainless steel tubing and passive zinc coated carbon steel piping. For ease of maintenance we complete the connection with viton sealed, grooved couplings and self-sealing high pressure compression fittings.

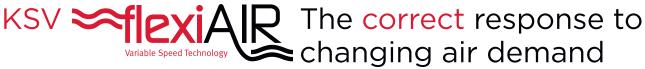

#### Belt Free Drive

With direct or gear drive coupling, the belt free drive KSA/KSV55-90 Series compressor range not only reduces transmission losses, it improves efficiency and reduces noise. Most importantly, it delivers greater reliability and reduced maintenance costs.

#### **Energy Efficient Motor**

High efficiency TEFC IE3 electric motors are fitted as standard to the enitre KSA/KSV55-90 Series screw compressor range, reducing not only your power consumption but also your CO<sub>2</sub> emissions.

#### Variable speed compressor: One smart solution

Variable speed compressors can efficiently and reliably handle the varying air demand found in most plant air systems. These compressors speed up and slow down to match air supply to air demand as it fluctuates.

The right variable speed compressor in the right application delivers significant energy savings and a stable, consistent air supply.

#### Compressor energy cost example

| Nominal<br>kW | Operating Cost per Year (5000 hours) at Cost per kWh (€) |          |          |          |          |          |  |  |  |
|---------------|--|----------|----------|----------|----------|----------|--|--|--|
|               | 0.06   | 0.08     | 0.10     | 0.12     | 0.14     | 0.16     |  |  |  |
| 55            | € 16.500   | € 22.000 | € 27.500 | € 33.000 | € 38.500 | € 44.000 |  |  |  |
| 75            | € 22.500   | € 30.000 | € 37.500 | € 45.000 | € 52.500 | € 60.000 |  |  |  |
| 90            | € 27.000   | € 36.000 | € 15.000 | € 54.000 | € 63.000 | € 72.000 |  |  |  |

Note: Hours of operation based on two 8hrs-shifts, 6 days per week. Calculations based on nominal kW.

#### Designed for serviceability

Maintenance personnel love the KSA/KSV series compressor range. Service access is quick and easy with all doors able to be removed in seconds.

We've also made sure serviceable components including filters are easily accessible and no piping needs to be disconnected to service the separator.

Allows substantial energy savings of at least 25% of the energy cost

#### Heavy Duty Inlet Filter

Dirt and dust that enter the compressor can adversely impact lubricant and machine life. An inlet filter with an efficiency rating of 99% is standard equipment on the KSA/KSV Series compressor range.

# KSA/KSV55-90

# Controller

The control system ensures reliable operation and protects your investment by continuously monitoring the operational parameters, essential to reducing your running costs.

The controller also has the capability to have programmable inputs and outputs, control additional equipment, as well as providing the following features with clear readable instructions.

- Smart energy cost calculation
- Clear text indicator display
- Multiple languages
- Microprocessor controller
- Pressure, temperature & runtime display
- High temperature, high pressure & reverse-phase protection function

- Filter and oil change reminder
- Low 24V/DC control voltage.
- Intelligent protection in extreme environments
- Safe operation protection
- Multiple pressure/temperature input points
- Integrated sequence control (up to 8 compressors)
- RS-232 series communications for local monitoring
- Optional RS-485 ethernet communications for remote monitoring via Airbus485™ or Modbus RTU
